

## Colony Point Condominium: Underground Sewer Drain Rehabilitation

Location: Punta Gorda, Florida

### Situation:

After the cast iron drain system had leaked into some of the units, the Colony Point Condominium Owner's Association decided to get the underground drain pipes checked and repaired if damaged. Nu Flow found that this sewer system, beneath a concrete foundation, was corroded and cracked.

### Solution:

Nu Flow successfully cleaned and lined the aged, underground sewer drain system without having to damage the building or disrupt residents. The customer was extremely pleased with our cost-effective work and Pull-in-Place technology, preserving the concrete foundation.
